And they all come with the best (good, best!) answers. Content Mathster is a great resource for creating online and paper-based reviews and assignments. They please allowed me to create 3 updateable versions along with each worksheet, answers. Worksheet Name 1 2 3 Index Rules - Fundamentals 1 2 3 Index Rules - Advanced 1 2 3 Corbett Maths keyboard_arrow_up Back to Top Corbett Maths, outstanding, original exam style questions on any topic, as well as videos, past papers and 5 days a day. It is really one of the very good websites around. The RAG worksheet for higher skill groups can be used as revisions. (I didn't create these questions, I found them somewhere) Read moreFreeReport a problemThis resource is designed for teachers in england. View the US version. FreeGCSE IGCSE Mathematics Mathematics - algebraic laws of indexes - solving problems with indices - differentiated application worksheets with space for answers - solutions including moreFreeReport is a problemDa moreFreeReport is a problemThis resource is designed for UK teachers. View the US version. I did this work for the low confidence mid-set Y9 group. 1 & 1b - I started with basics using multiple link blocks to allow students to research square and cube counts. The 1b worksheet takes them to apply these skills to upgrade numbers to different powers. 2 - focuses on finding the non-square roots of numbers, and then examines the multiplication and division using the indices. 3 - numbers, mixing and matching activity using multiplications and sections 4 and 4b - it tries to understand what negative indices mean and how we can solve them. This challenge includes researching why it is one to increase numbers to the power of zero.
